example.net	16 days	Warning	3 Mar 2027	OK	Warning
Client Beta (example.org and subdomains - 6 domains, 3 shown)					
example.org	91 days	Healthy	9 Sep 2026	MX changed	Warning
shop.example.org	91 days	Healthy	9 Sep 2026	OK	Healthy
blog.example.org	91 days	Healthy	9 Sep 2026	OK	Healthy

ISSUES NEEDING ATTENTION

WARNING

example.net

SSL certificate expires in 16 days (14 May 2026). Renew immediately - auto-renewal may not be configured.

WARNING

example.org

MX record changed on 22 Apr 2026: mail.example.org to mail2.example.org. Verify this was an authorised change.

RECOMMENDED ACTIONS

1

Renew SSL certificate for example.net

16 days remaining. Log in to your certificate provider and trigger a renewal. Confirm auto-renewal is enabled to prevent recurrence.

Priority: High

2

Confirm MX change on example.org

An MX record change was detected on 22 Apr 2026. If intentional (mail provider migration), mark as reviewed. If unexpected, revert immediately.

Priority: High

3

Enable auto-renewal on example.net

After renewing, confirm auto-renewal is active at your registrar and certificate provider. Check that the payment method on file is current.

Priority: Medium

METHODOLOGY

- SSL certificates: Checked daily by connecting to each domain over HTTPS and reading the certificate chain. Expiry date and issuer recorded.
- DNS records: A, AAAA, MX, NS, and CNAME records checked daily and compared to baseline. Changes flagged for review.
- Domain registration: RDAP queried daily for registration expiry date and registrar information.
- This report uses sample/demo data only. Agency name, client names, and domains are illustrative.
